ABOUT COMPANY

Gerresheimer is the global go-to partner for drug packaging and drug delivery systems with a broad product range for pharma, health, well-being and biotech. We bring every type of medication safely, reliably and conveniently to or in the patient.

On the following pages we have compiled information about us. Starting with a detailed page about who we are, our portal for the press, followed by our worldwide activities, up to our investor relations activities.

For the success of the Gerresheimer Group it is essential that the enterprise is managed responsibly according to ethical business principles and in compliance with the laws and rules of fair competition.

The Gerresheimer Compliance Management System (CMS) was introduced in 2009 and has continuously been developed ever since. Right from the start, compliance efforts focused on combating corruption and adhering to the provisions of antitrust and capital market law. It is in these areas in particular that infringements can cause major damage or loss which must be avoided by all means. It goes without saying that Gerresheimer promotes conduct aligned with the rules of compliance in all other areas as well.

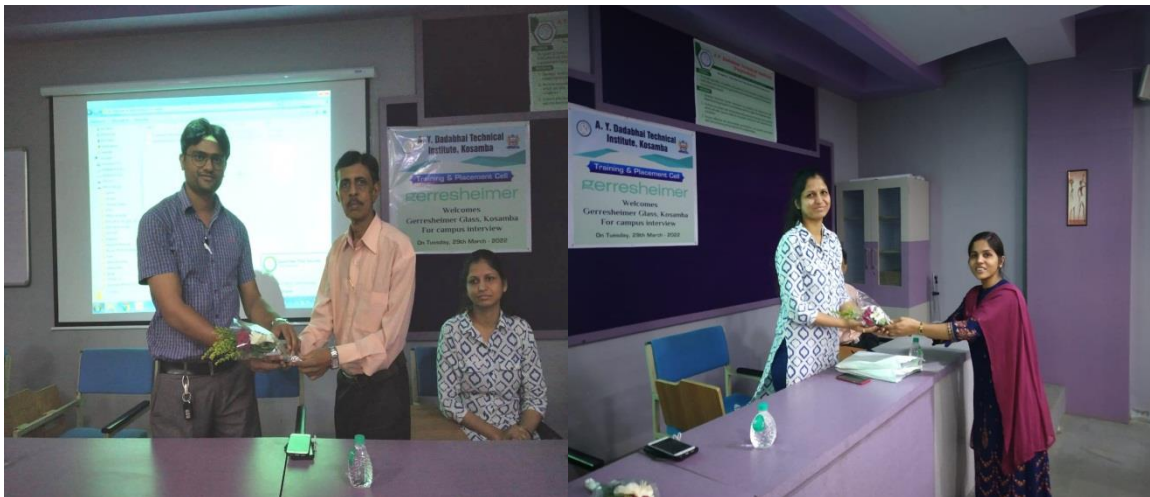

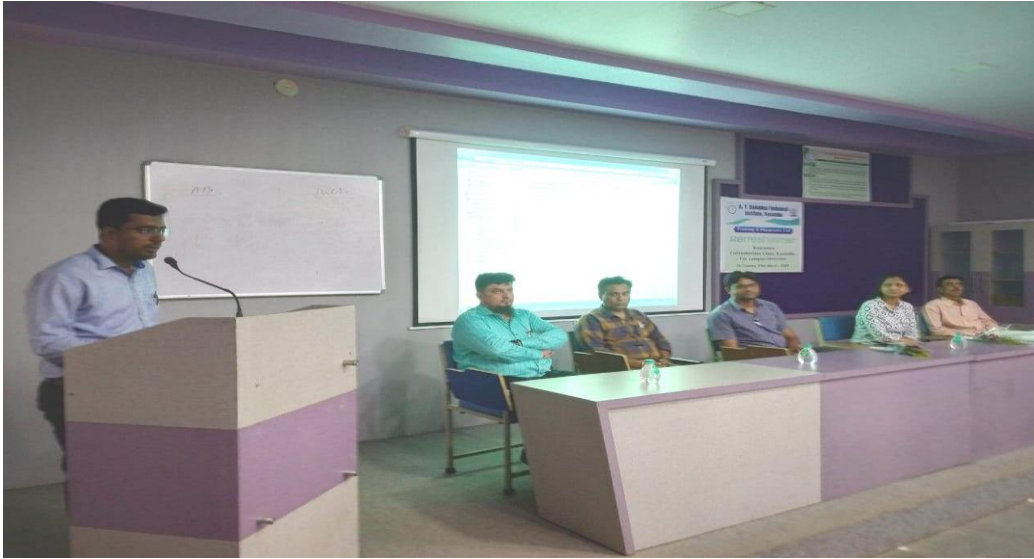

The core elements of the CMS include the Gerresheimer Compliance Program, on-site training, web-based e-learning programs, and a whistleblower system that allows reports to be made anonymously if desired.

Company's production locations worldwide

Gerresheimer is a global company with production sites and locations in 15 countries spread across three continents. We produce in the region for the region, around the world. This allows us to be near our customers and the market and to be familiar with international and local regulatory framework conditions. Our large number of production sites also ensures a secure and reliable supply for our customers.
